Get List of Posts

/api/posts/

Request

Retrieves a list of posts that the current user can access. This includes posts created by the current user, as well as posts of users that the current user is following.

Parameters:

- **limit** (int, optional): Limits the number of posts returned (defaults to 10, maximum is 50).

Response

**List<Post>**: List of post objects that are accessible to the current user.

Test /api/posts/
